

Ramona Kubilius Anderson

Ramona Kubilius Anderson is the Program Manager of the Prescription Drug Overdose (PDO) PFS grant in the Office of Injury and Violence Prevention for the CT Department of Public Health (DPH). She previously functioned as the State Immunization Action Plan Coordinator. Prior to state service, Ramona worked for 16 years in different capacities for the New Britain Health Department. She loves gardening, attending musical theater productions and singing. When not found at her desk, she is in a car visiting her adult children or delivering program supplies. Her greatest fear is probably not having a voice, which is probably why she works to let everyone have theirs heard.

She is here today to discuss NORA, the Naloxone + Overdose Response App, released this past April.
